		<b>PHYSICO-CHEMICAL PROPERTIES</b>																																																								
		Product Chemistry Tests																																																								
		<b>ECOTOXICOLOGICAL INFORMATION</b>																																																								
		Ecotoxicology analytical method development																																																								
OECD	201	Growth inhibition study aquatic plants																																																								
OECD	202	Short term toxicity testing on invertebrates																																																								
OECD	203	Short-term toxicity testing on fish																																																								
OECD	207	Earthworm, Acute Toxicity																																																								
OECD	208	Terrestrial Plant Test: Seedling emergence and Seedling Growth Test																																																								
OECD	209	Activated sludge respiration inhibition testing																																																								
OECD	210	Fish, Early-Life stage toxicity test																																																								
OECD	211	Daphnia sp., Magna Reproduction Test																																																								
OECD	216	Soil Micro organisms: Nitrogen Transformation Test																																																								
OECD	218	Sediment - Water Chironomid Toxicity Using Spiked Sediment																																																								
OECD	219	Sediment - Water Chironomid Toxicity Using Spiked Water																																																								
OECD	221	Lamnia sp. Growth Inhibition Test																																																								
OECD	222	Earthworm Reproduction Test																																																								
OECD	225	Sediment-Water Lumbriculus Toxicity Test using Spiked Sediment																																																								
		<b>FATE AND BEHAVIOUR IN THE ENVIRONMENT</b>																																																								
OECD	106	Adsorption/desorption screening																																																								
OECD	301	Ready biodegradability																																																								
OECD	305	Bioaccumulation in Fish: Aqueous and Dietary Exposure																																																								
OECD	307	Aerobic and Anaerobic Transformation in Soil																																																								
OECD	308	Aerobic and Anaerobic Transformation in Aquatic Sediment Systems																																																								
OECD	309	Aerobic Mineralisation in Surface Water – Simulation Biodegradation Test																																																								
OECD	315	Bioaccumulation in Sediment-dwelling Benthic Oligochaetes																																																								
OECD	316	Phototransformation of Chemicals in Water – Direct Photolysis																																																								
OECD	317	Bioaccumulation in Terrestrial Oligochaetes																																																								
OECD	232	Inhibition of Reproduction of Collembola (Folsomia Candida) by Soil Pollutants																																																								

Approximate time from study initiation to draft report  
Extension dependent on type of testing
