

# Our Capability in Industrial Chemicals: Oilfield Chemicals

## Environmental Safety Testing

EPP has significant experience in performing the tests required to register products under the Oilfield Chemical Notification Scheme. We can perform the following tests to help you get your product registered:

- OECD 107 - Partition Coefficient (n-octanol/water): Shake Flask Method
- OECD 117 - Partition Coefficient (n-octanol/water): HPLC Method
- ISO 10253 – Marine algal growth inhibition test with *Skeletonema costatum*
- ISO 14669 – Determination of acute lethal toxicity to marine copepods (*Acartia tonsa*)
- PARCOM Part A – Sediment bioassay using *Corophium sp.*
- PARCOM Part B – Fish Acute Toxicity Test (modified OECD 203)
- OECD 305 – Bioconcentration in Fish: Aqueous and Dietary Exposure

**Bespoke study designs are also available on request**
